

Drillstack Preparation

VF s.r.l.
Machines and Tools for
PCB production

Flexipunch

The machine is able to drill holes and slots by punching process on Pre-preg stacks and Innerlayers.

The cycle is completely automatic with the exclusion of stack loading and unloading.

Technical data:

- Machine dimensions: 1.430 x 1.080 x 1.580 mm.(H)
- Weight: 330 Kg.
- Power: 1,5 KW-400 volts threephase.
- Compressed air: 60 l/min.- 6 bar
- Working area: 650mm x 550mm (other sizes under request)
- Stack thickness: Max. 6,0mm. (es: 30 sheets of Pre-preg da 0,2mm.).
- Hole numpbers: One or more holes long the edges.
- Distance form edges: Max. 20,0mm. (other values under request)
- Hole diameters: Max. 10,0mm.
- Hole shape: Round or Multiline slots. (other shapes under request)
