Macchine e attrezzature  
per la produzione di  
Circuiti Stampati

---

## Vista

- Inspection
- Bi-dimensional measurement
- Artwork Punching

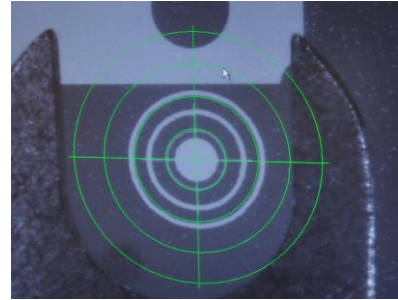

**Valentino Facci S.r.l.**

Via Torino 30  
36030 Caltrano  
Italy

## ARTWORK PUNCHING:

The artwork is roughly manually positioned over the Vacuum table and perfectly centered by micrometer Wheels. The operator with a simple hand movement Gives the start to the punching cycle

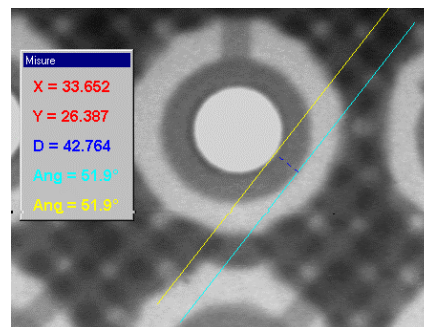

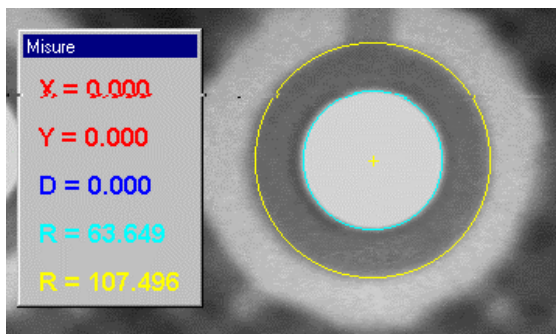

## Ispezione e Misurazione

The machine takes a picture of the area to be measured. The operator selects the dedicated pattern for the measurement and by the mouse place the pattern on the position of the measure.

Is possible to measure:

- Track width and distance track to track.
- Minimum and maximum Anular Ring.
- Pad diameter and hole diameter.
- Distance pad to pad
- Distance between tracks
